

SAA takes off with Tennant

James Kamau, managing director, Mfangano Solutions; Sampie Swanepoel, chief buyer - tools and equipment, operational procurement, SAA Technical and Hilton Van Vuuren, industrial specialist manager, GCE JHB.

SOUTH AFRICAN Airways (SAA) Technical has refreshed its cleaning fleet with the purchase of a Goscor Cleaning Equipment (GCE) Tennant M20 scrubber-sweeper from Mfangano Solutions.

Sampie Swanepoel, chief buyer of tools and equipment for SAA Technical, says that when this new scrubber-sweeper was selected to replace ageing machines in the fleet, he was particularly pleased to see the world-leading brand back on the floor.

"I have known Tennant machines to be powerful and reliable machines. I have always been happy with the stress-free performance of this ride-on machine."

The airport hangar application is a demanding one. A massive surface area must be regularly swept and scrubbed to battle an accumulation of dust, oil, stubborn dirt – "you name it"

Swanepoel says. For these reasons, a top-drawer cleaning solution was required.

Alex Theodoridis, GCE's national sales manager, says he is pleased that SAA has bolstered its range of cleaning equipment with the Tennant M20. "The M20 is one of the most popular machines in our fleet, and for good reason. It is not two separate machines bolted together like traditional sweeper-scrubbers. Its integrated design makes it a potent cleaning solution for a host of applications."

Key features of the Tennant M20 include a side brush, which provides superior edge-cleaning capabilities and maximises productivity, and an on-board spray hose that spot-cleans to increase cleaning flexibility.

"The Tennant M20 is safe, durable and easy to maintain. Its heavy-gauge steel frame helps

to extend machine life," Theodoridis says.

He explains that the integrated design halves the cost of ownership by reducing the need to maintain separate machines.

The M20 can also clean a vast area in a relatively short amount of time – on average, 5 000 sq m an hour, with a recommended usage of 6hrs per day.

Theodoridis adds that Goscor has an excellent rapport with Mfangano Solutions. "We look forward to strengthening the relationship between ourselves and this exciting company," he says.

James Kamau, owner of Mfangano Solutions, says he chose Goscor because it has solutions to meet client needs. "Goscor Cleaning has the experience and expertise to help every customer understand their needs, and to find the right product or cleaning system

for any application," Kamau said.

According to Kamau, the support from Goscor Cleaning Equipment is fast and reliable. "The Goscor team always goes out of its way to make sure that the end-customer is satisfied."

Mfangano Solutions is a company that has proved itself in its three primary areas of focus: waste management solutions, environmental equipment supply, and professional services.

As part of the Goscor Group of Companies, and now part of Imperial Holdings, Goscor Cleaning Equipment provides cleaning solutions from a wide range of quality world-class brands, including global leaders such as Tennant, Ghibli, Delfin, Maer and many others, to suit almost every cleaning application.

It has provided quality industrial cleaning solutions for the past 27 years.
