

vacuum and jetting systems on standard truck chassis homologated for on-road use in Southern Africa. "The new Mobile Vacuum Trailer is a direct result of our close cooperation and team work with Highpoint Vacuum. This machine meets the need that we identified in the market for an easy to set up and manoeuvre machine for plant clean-ups."

The unit is powered by a turbo-diesel engine which drives Highpoint's own vacuum pump via a reduction gearbox. The elimination of belts and pulleys increases reliability and reduces maintenance costs for the end-user. Fitted on a heavy duty frame with tandem braked axles and 16 inch wheels, the compact machine can be conveniently towed behind an LDV to access difficult to reach industrial and mine sites. The HPVR-1000 Combi Vacuum truck for high pressure jetting applications is another innovation from Goscor Cleaning Equipment and Highpoint Vacuum which, completed the product offering on the IFAT stand.

Goscor Cleaning Equipment's stand at Bauma Conexpo Africa exhibited a Positive Displacement Blower (PDB) wet and dry vacuum truck. Featuring a 12 500 tank capacity, the HPVR-1000 PDB is ideally suited for the efficient handling of a wide variety of materials, from slurries to cement and fly ash.

The mining and industrial trade fair was also the launch platform of one of Goscor Cleaning Equipment's most advanced heavy-duty mechanical-suction sweepers currently available on the market. The M60's 6 m<sup>3</sup> hopper and 6000 kg net payload ensure unmatched performance in extremely heavy-duty urban and industrial conditions. The machine works dust-free in the dustiest of conditions thanks to the PM10 large surface filters. The advanced CanBus (Controller Area Network Bus) control system connects all the modules working throughout the machine for maximum effectiveness and efficiency. In addition to the load sensing hydraulic system which reduces fuel consumption, the M60 also features a powerful, quiet suction turbine, 4-wheel power steering and 180° right/left hand side front adjustable brush. Comfortable front and rear suspension, a tilting cab and a central drive position ensure optimum operator comfort.

Rounding off Goscor Cleaning Equipment's display of cleaning technology at this year's Bauma was the Tennant Sentinel power sweeper. The unit's self-adjusting centre-point-suspended main brush efficiently picks up sand, dirt, rocks, broken glass and light bulk debris. The state-of-the-art Sentinel dry dust control system with its twin vacuum design, traps particles as fine as three microns, meeting the most stringent PM-10 environmental requirements of less than 10 microns in size with ease.

Goscor Cleaning Equipment is responsible for all maintenance, service and repair of its vacuum and cleaning machines and equipment. "Our fully qualified after-sales field service team located in various regions around the country is well stocked with parts and spares and offers a rapid 24/7 response to ensure maximum uptime for customers," concluded Venter. 🌐

## WE'LL TAKE CARE OF IT

With our innovative and quality products.

An international leader in the field of quality and reliable equipment, Komatsu is a diversified provider of **construction & mining equipment**, compact utility equipment and forestry machines.

### Unique features of the Komatsu GD675-5 Motor Grader:

- New 163kW **Tier 3 emissions** rated engine
- Fitted with Komtrax - Komatsu's **remote fleet monitoring system**
- Equipped with an **8 speed fully automatic transmission**

### DRIVEN BY YOUR SUCCESS
