EQUIPMENT**

Industry: **Retail**
Super Spar Midwater, Middleburg

Customer Overview

Super Spar Midwater in Middelburg purchased their first Tennant T2 walk-behind scrubber machine from Goscor Cleaning Equipment three years ago for their 2000 sqm shop floor. As a food store, hygiene and safety are critical factors and it's critical that the floor surface are kept spotless.

The Tennant T2 scrubber-dryer is used every day before the shop opens to remove general day-to-day dirt created by customer traffic. "We also use the machine during the day to clean up spillages in the aisles," says Daniel.

Challenges

According to Daniel, the T2 is expected to perform cleaning duties almost every day of the year. They needed to replace the Tennant T3 scrubber and decided that after 3 years of reliable performance, they would purchase a second machine.

Solutions

Super Spar Midwater selected the latest version of the T2, due to its operational efficiency and ability to scrub, clean, suction and dry small congested areas in one pass.

The revolutionary **T2 walk behind scrubber** is changing cleaning standards.

“ We rely on Goscor Cleaning Equipment’s prompt service team when machine maintenance is required ”

Benefits

With a 23 kg down pressure and 230 rpm agitation, delivered through a powerful 0.75 kw brush motor, this scrubber-dryer model provides Super Spar with the highest level of cleanliness. In addition, the machine’s water recovery leaves the floor dry immediately, allowing for the safe passing of foot traffic.

The T2 is ideal for Super Spar as it’s designed for environmental safety and presents an effective cleaning solution for food and beverage retail areas. The handy easy-to-clean hygienic recovery tank and debris tray reduces unwanted scrubber tank mould and bacteria. The machine’s maintenance free battery operation emits lower emissions for improved air quality.

The user friendly and safe design of the T2 makes the machine extremely easy to operate, reducing operator fatigue for increased productivity. According to Daniel, following initial operator training, only refresher operator courses are needed from time-to-time.

Daniel reports that the new T2 has seamlessly taken over the job from its forerunner and continues to deliver reliable performance. “We rely on Goscor Cleaning Equipment’s prompt service team when machine maintenance is required,” he adds.

“The decision to replace the Tennant T2 with the latest model was a no-brainer,” concludes Daniel.
